

Computer Assistive Technology Locations on Campus

Access Workstations

Access workstations are designated workstations within computing labs that contain specialized assistive technology such as Jaws and Kurzweil. Software with the  icon is only found on one workstation within each lab.

Premier Suite**											

For a complete listing of CIT labs hours of operation: <http://www.cit.cornell.edu/labs/>

For Mann Library hours of operation: <http://www.mannlib.cornell.edu/>

For the Engineering computing lab hours: <http://www.accel.cornell.edu/>

For the Law School Library hours: <http://library.lawschool.cornell.edu/WhoWeAre/Hours.cfm>

** The Premier Suite includes the following software:

Scan and Read Pro

Compatible with most flat bed scanners. Just place a book on the scanner and within a few seconds Scan and Read Pro can be reading it to you.

Talking Word Processor

Talking Word Processor has an integrated dictionary and the world's most powerful talking grammar check.

Premier Predictor Pro

Talking word prediction that works with every program where typing is required.

PDF Equalizer

PDF Equalizer can access, read, work with and supplement PDF files from ANY source.

Includes multi-lingual support -- dynamically change the user interface to the language of your choice in English, French, or Spanish.

PDF Magic Pro

Outstanding for converting inaccessible PDF files to accessible formats.

Text-To-Audio

Convert documents from your computer into MP3 audio files. Use with your personal player while you are away from your computer.

E-Text Reader

A tremendous study tool that allows you to highlight, bookmark, search and extract text from a document.

Universal Reader Plus

Ideal for reading emails and web pages.

Ultimate Talking Dictionary

A 250,000-word Ultimate Talking Dictionary with an integrated thesaurus with partial word look-up.

Talking Calculator

An easy-to-use fully functional calculator that reads your calculations to you.

Training videos for the Premier Literacy suite can be found at:

<http://www.readingmadeez.com/training/videos.html>. The training videos are designed to provide an overview of E-Text Reader, PDF Equalizer, Scan and Read Pro and others. The software and training videos are also available in most CIT labs and several department and library computing labs.

Assistive listening devices can be found at the following locations on campus:

- Bailey Hall
- Baker Laboratory 200
- Baker Institute Lecture Theater
- Biotechnology Building G10
